DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35
 U.S.C. 119(a)-(d). The certified copy was filed on 7/31/03.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 08/25/2003 has been considered by the examiner and made of record (note the attached copy of form PTO-1449).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent Number 6,492,698 to Kim et al.

Kim et al. discloses in abstract and figure 2 a transceiver comprising a conductor foil (230) carrying an opto-electronic component, a plug socket into which an optical waveguide connector can be inserted (270) such that an optical waveguide of said optical waveguide connector is opposite said opto-electronic component, and a plug section which is formed by an end section of said conductor foil and adapted to be connected with a complementary plug, wherein a signal path from said plug section to said opto-electronic component has a matched impedance (column 8, line 33).

Application/Control Number: 10/631,296 Page 3

Art Unit: 2874

As to claims 2-4, a spacer and stop is provided on the foil for the optical waveguide connector (250, 260).

As to claims 5-6, Kim et al. discloses that any type of adhesive or glue may be used for the stiffener plates.

As to claims 7-11 and 18, a hole is provided for guide pins and is all arranged with a heatsink.

As to claims 12-16, drivers are bonded to the foil.

As to claim 17, the component is arranged at a right angle (Figure 7).

As to claim 19, the control elements are provided by means of which operating parameter of said transceiver can be adjusted (Column 4, lines 26-43).

As to claims 20-23, Kim et al. discloses in figure 7, a conductor foil with a signal path only on one side of a rigid structure in a plug section that is mounted as to be displaceable.

Inventorship

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Conclusion

Application/Control Number: 10/631,296 Page 4

Art Unit: 2874

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. United States Patent Number 6,685,364 to Brezina et al. for a flexible cable packaging for use in a transceiver.
- b. United States Patent Application Publications 2003/0103734 and 2003/0103737 to Brezina et al. for flexible cables in a housing with a heatsink.
- c. United States Patent Number 5,596,665 to Kurashima et al. for a optical module with a flexible circuit.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Wong whose telephone number is 571-272-2363. The examiner can normally be reached on Monday through Friday, 830AM - 430PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on 571-272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
